

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) Bottom unit of a stretch-wrapping machine for rotating pallet goods, said bottom-unit (1) resting on a ground and comprising a turntable (11) having a lower limiting surface (11a) and an upper limiting surface (11b) and being rotatably supported, by means of support rollers (22), on a base (10) of the bottom unit (1), said support rollers (22) resting on the base (10) with peripheral portions thereof characterised in that the supporting rollers (22) to a substantial part are located above the lower limiting surface (11a) of the turntable (11).

2. (Original) A bottom unit as claimed in claim 1 characterised in that the support rollers (22) are extending through the upper limiting surface (11b) of the turntable (11).

3. (Original) A bottom unit as claimed in claim 1 or 2 characterised in that the support rollers (22) are arranged in two groups, that the support rollers (22) in each group are oriented mainly on a straight line and that the

lines are essentially parallel with each other, seen in top view of the turntable (11).

4. (Currently Amended) A bottom unit as claimed in ~~any of the previous claims~~ claim 1 characterised in that U-profiles (20) are mounted on the upper limiting surface (11b) of the turntable (11) and that the U-profiles (20) constitute supports for the shafts (34) of the support rollers (22).

5. (Original) A bottom unit as claimed in claim 4 characterised in that the shaft (34) of each support roller (22) is mounted in holders (32) connected to a U-profile (20).

6. (Original) A bottom unit as claimed in claim 4 or 5 characterised in that the support rollers (22) are received in holes in the U-profiles (20).

7. (Currently Amended) A bottom unit as claimed in ~~any of the previous claims~~ claim 1 characterised in that spacings (15) are mounted in the turntable (11) and that the spacings (15) are projecting from the lower limiting surface (11a) of the turntable (11).

8. (Original) A bottom unit as claimed in claim 7 characterised in that the spacings consist of plastic pieces (15).

9. (New) A bottom unit as claimed in claim 2 characterised in that U-profiles (20) are mounted on the upper limiting surface (11b) of the turntable (11) and that the U-profiles (20) constitute supports for the shafts (34) of the support rollers (22).

10. (New) A bottom unit as claimed in claim 9 characterised in that the shaft (34) of each support roller (22) is mounted in holders (32) connected to a U-profile (20).

11. (New) A bottom unit as claimed in claim 9 or 10 characterised in that the support rollers (22) are received in holes in the U-profiles (20).

12. (New) A bottom unit as claimed in claim 2 characterised in that spacings (15) are mounted in the turntable (11) and that the spacings (15) are projecting from the lower limiting surface (11a) of the turntable (11).

13. (New) A bottom unit as claimed in claim 12 characterised in that the spacings consist of plastic pieces (15).

14. (New) A bottom unit as claimed in claim 3 characterised in that U-profiles (20) are mounted on the upper limiting surface (11b) of the turntable (11) and that the U-

profiles (20) constitute supports for the shafts (34) of the support rollers (22).

15. (New) A bottom unit as claimed in claim 14 characterised in that the shaft (34) of each support roller (22) is mounted in holders (32) connected to a U-profile (20).
